

Review of the advances in meteor studies

J. Borovička¹

¹Astronomical Institute, Academy of Sciences, 251 65 Ondřejov, Czech Republic

I will present a personal conference summary in the field of meteor studies. The most important advances concerning meteors since the last ACM conference (2012 in Japan) will be highlighted. The most interesting event, which occurred in between and was discussed also on this conference, was the Chelyabinsk superbolide. Nevertheless, progress was made also in other meteor studies.
